Prepaid Cards

65+ Currencies

2M ATM and cash-access points

FX Controls

100+ Countries

Built-in Compliance

Integrated compliance, fraud prevention and risk mitigation features take care of regulations, KYC, KYB, data security, and more.
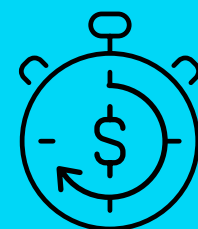

- ☑ Country specific regulations
- ☑ Identity Verification
- ☑ AML, sanction list monitoring
- ☑ Fraud monitoring

The Rapyd Disburse Advantage

REACH

Building from our expansive global payments network, Rapyd Disburse supports payouts to 100+ countries, in 900+ payment method types such as ewallets, cards, bank transfers and cash. Our foreign exchange settings enable payouts from any currency to any currency.

SPEED

Enter new markets faster and start disbursing funds globally by using our simple user interface to upload files. Set up XML batches using the ISO 20022 messaging standard. Or use the Rapyd Disburse API to integrate powerful disbursement features into your existing infrastructure.

TECHNOLOGY

Rapyd's Fintech as a Service approach includes numerous capabilities that normally require separate integrations, including built-in features like IDV, AML, and fraud protection. A validation engine ensures payouts go to the right person or account — plus beneficiaries are tokenized making your next payout cycle faster. Recurring payouts, single reconciliation and settlement add up to a robust yet flexible platform.

Power Fintech Innovation with All of Rapyd's Platforms

Create best-in-class commerce experiences for workers, sellers, and customers around the globe. Accept more payments, create a digital wallet for your users, issue company branded cards.
