OF THE ENTIRE
GLOBAL POPULATION
WILL USE MOBILE
WALLETS*

Streamline your payments system

Rapyd Wallet is designed for businesses that want to financially empower their sellers, partners and customers around the world. Rapyd's powerful Wallet platform supports localized and personalized money management experiences. Unlike most white-label digital wallet products, Rapyd offers global scalability and an extraordinary breadth of payment and financial services that can plug directly into the wallet. Supporting 65+ currencies and multiple payment methods our white-labeled wallet can remove barriers for global users to transact electronically.

By integrating to Rapyd's Wallet API, businesses can focus on growing new markets and empowering their users financial lives rather than building their own wallet infrastructure.

**Design a wallet
that supports your
business model**

Create a streamlined payments system that can scale across the globe

Choose from a set of powerful features and develop a wallet that can become an asset for business growth and expansion, an additional revenue stream, and foster brand loyalty with your workforce, vendors, and consumers.

Wallet Management

Control escrow sub-account funds and on-hold balances, transfer, add, and fund removal between wallet and sub-wallet accounts. Disable, enable and retrieve wallet balances, activity, and transactions.

Multi-Currency Support

Hold value in over 65 currencies, enable FX services for users, and quickly scale to over 100 countries.

Multi-Tiered Accounts

Enable sub-account management for customers, sellers, and partners. Single or multi-use global stored value accounts backed by Rapyd's global technology infrastructure and locally regulated entities and partners.

Identity and Compliance:

Quickly onboard new users by using Rapyd's IDV technology, verify identities in over 100 countries, plus sanction screening, AML, KYC, KYB, risk-based monitoring, CIP, fraud detection, GDPR, and data protection.

Add-on Financial Services

Rapyd's built-in capabilities can be combined with third-party services to offer a full suite of financial services.

- **Use Rapyd Collect to enable users** to withdraw, load, or transfer funds locally or cross border.
- **Pay wages, commissions, and bonuses and transfer funds** using the Rapyd Disburse engine.
- **Put your brand front-and-center by offering your workforce a white-label virtual** or plastic debit card with Rapyd Issuing.
- **Leverage third-party services** to enable users to pay bills and access services online and in-store.

Fraud Detection and Security

Anti-fraud and AML monitoring from device and SIM fingerprinting and user scoring. Encryption and tokenization keeps user data and transactions secure.

Rapyd's Integrated Fintech-as-a-Service

A single API and world-class developer experience lets you build exceptional cross border commerce experiences.

Access the world's largest local payment network
Over 900 payment types in over **100 countries** available
Accept cash at over 2M locations worldwide and 600,000 ATMs across the globe
