Rapyd for Online Trading Platforms

Turbo-charge growth. Expand services. Improve experiences. Hit the ground running in new markets.

Rapyd

Rapyd: The Growth Engine for the Next Generation of Investment Platform

Online trading platforms are the new powerhouses of investment. Many have grown fast in the last two years but there are still opportunities to get bigger – especially in emerging economies. To take advantage, payments should be forming a large part of your growth strategy.

At Rapyd, we provide cross-border payments and payouts that turbo-charge growth – launch fast in new markets and attract millions of new customers with a single API.

How Rapyd Helps Online Trading Platforms

Transparency
Our detailed ledgers provide visibility into every transaction including the sender and receiver of funds, currencies, foreign exchange fees and more.
Experiences
Empower more customers, even the unbanked, to deposit and cash out funds in their local currency – with hundreds of different payment methods supported by the Rapyd Global Payments Network.

Payments & Payouts
We help eliminate wire transfers and can offer better foreign exchange fees – lowering costs for you and your customers. Using our multi-currency virtual accounts, you get fast cross-border payments and payouts – streamlined.

Key Benefits

- Accept Payments in 100+ countries and send payouts to 190+ countries.

- Support local currencies with lower FX rates

- Instant access to funds supports real-time trading

- Rapyd Virtual Accounts improves cash liquidity and operational speed

- Manage and monitor all account activity through the intuitive Rapyd Client Portal

- Rapyd clients see an average 196% ROI in the first year and spend 70% less time managing payments

"Once we offer local payment methods in a market, we see an increase in transactions because our platform is more accessible. This increases customer satisfaction, which leads to increased trading, referrals and deposits."

——

Lex Van Lynden,
Head of Marketing at Gotrade
